Group Dynamics in Occupational Therapy: The Theoretical Basis and Practice Application of Group Treatment, Second Edition examines seven frames of reference for group therapy. This book describes the seven-step method in leading a group, and teaches the reader how the traditional body of knowledge in group dynamics applies to occupational therapy. This edition includes information on co-leadership in today's practice, the pros and cons of its use, and how co-leadership can help therapists plan effectively and gain valuable feedback. Section Two, Group Guidelines From Seven Frames of Reference, has been greatly revised to reflect the latest in group dynamics. Marilyn B. Cole has dedicated an entire chapter to Allen's Cognitive Disabilities Groups because of its extensive development over the past decade. Chapter Five, The Behavioral Cognitive Continuum, represents an attempt to organize the many concepts and techniques occupational therapists use in group treatment, which relate to behavioral and cognitive theory. The chapter describing the Model of Human Occupation Approach has been revised to include new theoretical developments and research. The importance of occupational choices, habit maps and habitat, and roles and role scripts in the context of one's social group and culture are discussed.

The Occupational Therapist's Workbook for Ensuring Clinical Competence is designed to help occupational therapy students and new practitioners demonstrate the practical problem-solving and real-life clinical reasoning skills essential for fieldwork and clinical practice. This user-friendly resource helps the reader apply occupational therapy concepts, improve narrative and pragmatic reasoning skills, and measure attainment of knowledge and skills needed for successful transition to fieldwork and entry-level practice. Inside The Occupational Therapist's Workbook for Ensuring Clinical Competence, a wide variety of client conditions, situations, and intervention options are presented for different practice areas. Knowledge and skills are assessed for fundamental aspects of occupational therapy such as: professionalism, ethical decision-making, evidence-based practice, evaluation and intervention planning, occupation-based interventions, effective communication, supervision, role delineation, activity analysis, cultural competence, interprofessional collaboration, group process, emerging practice areas, department management, safety, documentation, billing and reimbursement, and more. Marie Morerale and Debbie Amini have incorporated numerous worksheets, learning activities, and worksheet answers in an easy-to-read format. The variety of assessment methods and learning activities used throughout the text stem from the authors' combined decades of teaching experience and include: case studies, vignettes, multiple choice, matching and true/false questions; fill in the blanks, experiential activities and more. Topics are broken down into smaller units and explained step-by-step to allow for easy independent study. Thoroughly explained answers are provided so that readers can check their responses with suggested best practice. These worksheets and learning activities are also useful as role-playing exercises, studying in small groups, and can aid in preparing for fieldwork or the national certification exam. Instructors in educational settings can visit www.efacultylounge.com for additional materials to be used in the classroom. The Occupational Therapist's Workbook for Ensuring Clinical Competence is the go-to text for occupational therapy students and faculty, as well as new occupational therapy practitioners who require the practical problem-solving skills and the clinical decision-making skills essential for fieldwork and clinical practice.

Comprehensive Coverage of Therapeutic Modalities Used in a Clinical Setting A Doody's Core Title for 2011! Therapeutic Modalities in Rehabilitation is a theoretically based but practically oriented guide to the use of therapeutic modalities for pain management. The importance of making an evidence-based use of each different type of modality and allows clinicians to make their own decision as to which will be the most effective in a given situation. Presented in full color, the text describes various concepts, principles, and theories that are supported by scientific research, factual evidence, and experience of the authors in dealing with various conditions. The chapters in this text are divided into six parts: Part I—Foundations of Therapeutic Modalities begins with a chapter that discusses the scientific basis for using therapeutic modalities and classifies the modalities according to the type of energy involved in producing the most appropriate effects. Guidelines for using each type of modality are provided for each of the phases of the healing process are presented. Part II—Electrical Energy Modalities includes detailed discussions of the principles of electricity and electrical stimulating currents, iontophoresis, and biofeedback. Part III—Thermal Energy Modalities discusses those modalities which produce a change in tissue temperatures through conduction including thermotherapy and cryotherapy. Part IV—Sound Energy Modalities discusses those modalities that utilize acoustic energy to produce a therapeutic effect. These include therapeutic ultrasound and a lesser known modality-extracorporeal shockwave therapy. Part V—Electromagnetic Energy Modalities includes chapters on the diathermies and low-level laser therapy. Part VI—Mechanical Energy Modalities includes chapters on traction, intermittent compression and therapeutic massage. Each chapter ins Parts IV–VI discuss the: physiologic basis for use, clinical applications, specific techniques of application through the use of related laboratory activities, and relevant individual case studies for each therapeutic modality.

This textbook on assessment and outcome measurement is written for both occupational therapy and physiotherapy students and practitioners. It begins by defining what is meant by assessment, outcome, evaluation and measurement and discussing the complexity of therapy assessment and measurement, including the challenge of measuring human behaviour and the impact of factors such as task demand and context, including the environment. Methods of data collection (e.g. observation, interview, standardised testing) and sources (e.g. self-report, proxy) for collecting information about clients are then reviewed, and the main purposes of assessment (e.g. descriptive, evaluative, predictive, discriminative) presented. The book then addresses the topics of standardisation, levels of measurement, reliability, validity and clinical utility. There is a chapter describing and applying models for each of the levels of measurement. The concept and application of clinical reasoning and reflective practice is then explored. Application of principles is supported through detailed case studies and worksheets and the criteria for test critique and guidelines for choosing a particular assessment approach are discussed.

Evaluation, which promotes a greater understanding of the people occupational therapy serves, is the foundation of occupational therapy practice and provides evidence to guide “best practices.” This new edition of the classic text focuses on the role of the occupational therapist as an evaluator with assessment support provided by the occupational therapy assistant. Chapters discuss the various aspects of a comprehensive evaluation, including screening, evaluation, reassessment, and re-evaluation, and reaffirm the importance of understanding people as occupational beings. The expansion of this revision reflects contemporary evaluation approaches. Most importantly, the book declares that evaluation practices should be guided by the values that therapists hold and that readers to think about not only what the current practice environment wants an evaluation to be but also what the profession believes a comprehensive evaluation should be.

Developing Clinical Competence: A Workbook for the OTA helps occupational therapy assistant (OTA) students and novice practitioners develop the “practical” problem-solving and “real-life” skills essential for fieldwork and clinical practice. This user-friendly text helps the reader apply occupational therapy concepts and improve the clinical reasoning skills needed for academic coursework and successful transition to fieldwork and entry-level clinical practice. The methods, learning activities, and worksheets presented in Developing Clinical Competence stem from Marie J. Morreale’s more than 15 years of experience teaching OTA students. Worksheets and learning activities address areas such as professionalism, ethical behavior, clinical decision making, effective communication, roles and responsibilities, selecting and implementing interventions, safety, assessing client function, documentation, group process, and more. The worksheets, learning activities, and suggested worksheet answers are written in an easy-to-read format and include a variety of methods such as multiple choice, matching, and true/false questions, case studies, vignettes, fill in the blanks, and experiential activities. Although the chapters and exercises are presented in a logical progression, each chapter is fully independent of the others so readers can skip around and complete individual chapters or particular exercises in the order most conducive to individual learning needs. Appropriate for a variety of practice areas, Developing Clinical Competence can serve as a companion text for multiple classes throughout an OTA curriculum or as a useful study aid when preparing for fieldwork or the national certification exam. Instructors in educational settings can visit www.facultylounge.com for additional materials to be used for teaching in the classroom. Features and Benefits: Helps develop the practical problem-solving and common-sense skills essential for fieldwork and clinical practice! Contains user-friendly worksheets, learning activities, and suggested worksheet answers with competencies broken down into smaller units and explained step-by-step to allow for easy independent study! Provides thoroughly explained “answers” to the worksheet exercises at the end of each chapter with references! Presents scenarios that represent situations commonly encountered in clinical practice! Includes many helpful hints and clinical tips to teach readers what to do and how to react appropriately as health professionals OTA students, faculty, and new practitioners will benefit from the opportunity to take the information presented in Developing Clinical Competence: A Workbook for the OTA and apply important concepts and techniques, problem solve situations step-by-step, prioritize interventions, improve clinical reasoning, demonstrate professional behaviors, and communicate more effectively.
